PROJECT TECHNOLOGIES & SERVICES

PROJECTS MADE EASIER
WE LISTEN. WE PARTNER. WE DELIVER.

OUR MESSAGE TO YOU

"Our project management and engineering firm is small enough to personalize our relationship, but big enough to take on your largest projects, allowing you to focus on your day-to-day operations and production needs.

Our mission is to provide our clients with direct and honest information they need to assist them in making an educated and informed decision regarding their business, and assisting them through the project, as they request, in order to ensure their success.

Whether you are using us on an "as needed" basis for peak workload needs or for full-scope projects, we'll emphasize schedule, cost, scope and quality in our delivery."

- Jim Rader, President

CORE PRINCIPLES

Customer Satisfaction - We are committed to the success of our customers. We strive to understand their needs and exceed their expectations and we follow through to ensure they are 100% satisfied.

Honesty and Integrity - Our reputation is vitally important to who we are. We act with integrity and encourage open, honest dialogue with one another and with our customers and suppliers. We tell the truth and follow up on our commitments.

Safety - We maintain and encourage a safe, healthy and enjoyable working environment for ourselves and others we work with.

Life Balance - We work as a team and help each other. We strive to maintain a culture that enables our team to have balance between their professional responsibilities and their personal values. We work hard and step up when needed, but enjoy our time off with our families, friends and to pursue other interests

Continuous Improvement - We never stop learning and we look to improve ourselves each and every day.

TESTIMONIALS

"I have had the pleasure of working with the PTS team on several projects. I feel I have always gotten my money back by utilizing their services. Whether in project savings due to engineering solutions or creativity, or by pushing the schedule allowing for increased production. I would not hesitate to use PTS on any future projects."

- Chris A.

Project Manager, Forging Facility,
Houston, TX

"I appreciate the expertise your team provides and that they take ownership of their projects. I know that PTS will be responsive and do what's necessary to make sure the project goes well."

- Mike L.

Engineering Manager of Facilities and Utilities, Forging Facility,
Cleveland, OH

"Having used PTS on an ongoing basis for the past few years, I highly endorse their team for project management and engineering services. Their in-house engineers bring professionalism, engineering expertise and proficient project management skills to every project allowing us to focus on our day-to-day production needs. If you have peaks that you don't have the internal resources to oversee, I would definitely recommend PTS."

- Cory G.

Engineering Director, Food & Beverage,
Canton/Akron, OH
